GEOGRAPHY OF CHILDREN IN CHILD WELFARE

Child welfare investigations and foster care placements are geographically concentrated in the lowest-income and most predominately Black and Latino neighborhoods. The five community districts with the highest rates of investigation—Bronx districts 1, 2, 3, and 6 and Brooklyn district 16—are among the seven poorest community districts in the city and are all at least 94 percent Black and Latino. See detailed data on demographics, child welfare investigations, and foster care placements, by community district.

* ACS transitioned to a new Case Assignment System in early 2018, so the number of child protective caseworkers with caseloads over 15 is not available for the first two quarters of that year.
